PASSION

Logistics is passion for us, our team is enthusiastic in the quest for endless strategies in our international trade operations, and such passion drives us to offer you a boundless service.

HISTORY

2001

Silca Logistica Custom Agency begins operations in May 2001 offering comprehensive solutions in the logistic chain of international trade for importing and exporting companies across the country. We have earned prestige and reputation working under ethics and best practices, being custom clearance timing our main hallmark. SILCA Group is formed by: SILCA Logistica Custom Agency, SILCA Corporate, SLT Transportes freight forwarding y Soluciones and Punto Trading Company.

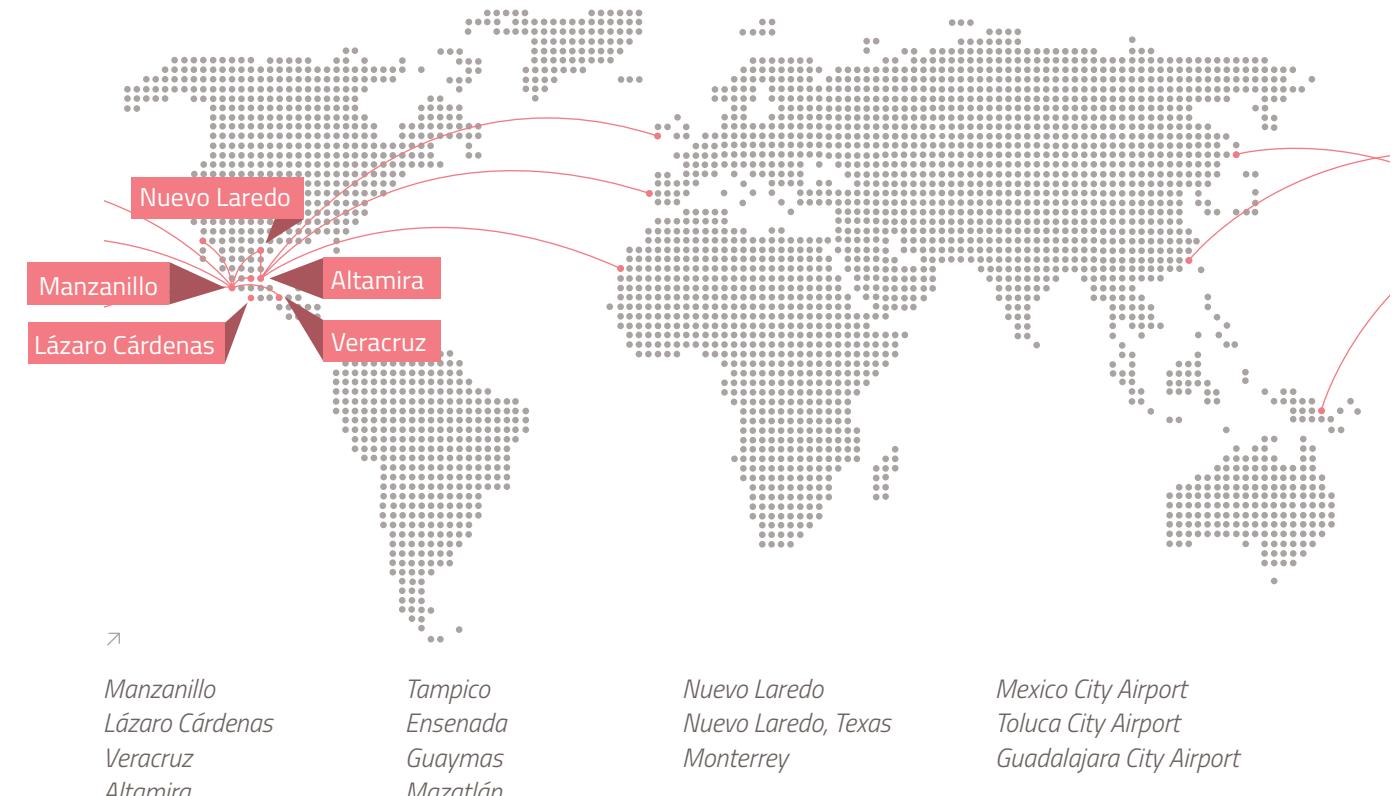

We count with agents, representatives, and offices- a complete nationwide teamwork - to offer timely and quality services, which guarantee successful international trade negotiations.

The company possesses an ISO 9001:2008 certification issued by the Asociación Nacional de Normalización Aduanera y de Comercio exterior (ANACE) (Custom and International Trade Normalization National Association) by certifying the importation and exportation custom clearance processes.

PRESENCE

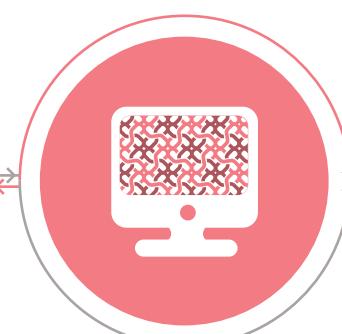

GIO

The Total International Trade Management is the result of the two main features of SILCA.

Know How

Business intelligence

Proposal

Know how

This consists of applying the best practices to a constantly changing process. This implies knowing and mastering all aspects in the supply chain -from origin to destination- to apply them for the improvement of their logistic processes, which is a fundamental factor which leads any operation to a positive destination.

Business intelligence

We place into a measurement the operational variables which affect logistic processes and analyze the tendencies which impact in any way its logistics, aiming to determine operational feasibility and even prevent or correct a mismatch or fail that might come up during the operation.

SERVICES

↓

At SILCA LOGISTICA we develop The Total International Trade Management aiming to meet productivity and professionalization expectations from our clients, and meeting global market demands as well.

↓

Planning, development and coordination of logistic processes

Timely acknowledging of your needs and requirements is fundamental for the strategies that allow us to develop highly profitable strategies for you.

Since the beginning, a commercial executive will be in charge of gathering all relevant information to perform a full and thorough analysis of your logistic process, which will allow us to offer you a tailor-made proposal. Our experience allows us innovating the development and implementation of logistic processes that satisfy your needs, meeting the requirements international trade sets up.

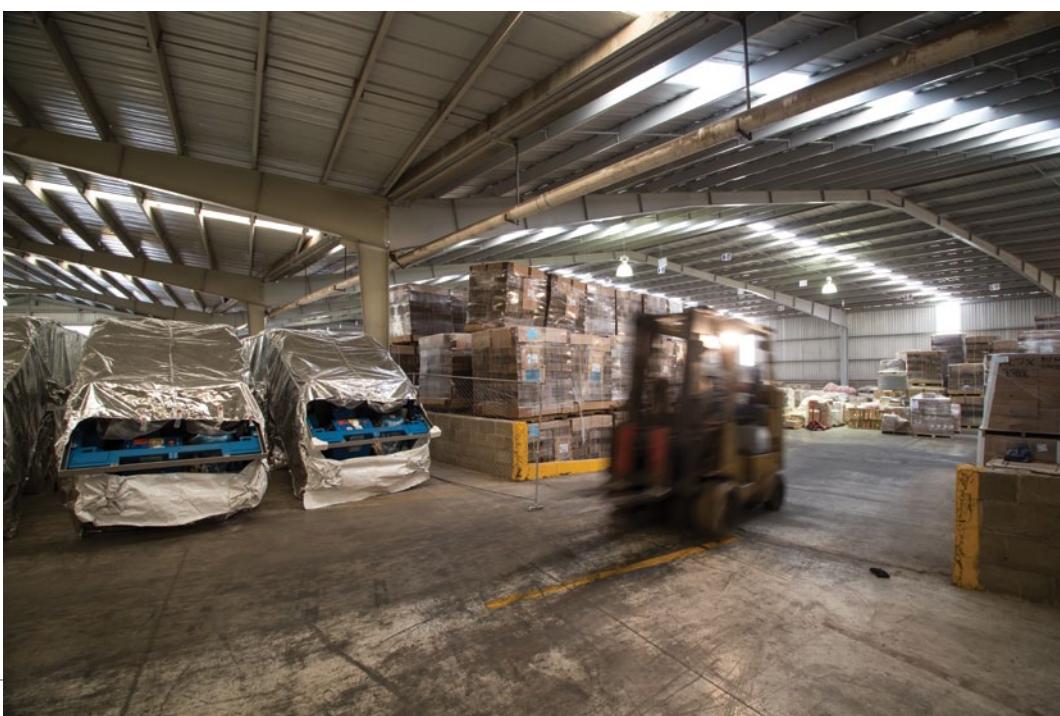

↓

Custom Clearance

We fully perform management in order to fulfill all legal and normative requirements within the logistic and custom clearance processes. We work all kinds of merchandise in any given customs regime, for importation and exportation as well, keeping in mind legal certainty, optimizing times and logistics. Thus, we are able to optimize profitability for your business.

During all the process, one of our top qualified multi-custom executives, will work on your requirements independently of the custom your operation is being performed. We are able to give you a timely monitoring from beginning to end, coordinating all services to warrantee the proper process development.

Thanks to the implementation of powerful technological tools we foresee your updating needs by sending automatic operations status notifications.

Our actions are based on a genuine responsibility and service call. The commitment to our clients gives us the opportunity to go beyond of our possibilities which will allow us to formulate a tailor-made solution proposal for your company.

COMMITMENT

National and international cargo services

From origin to destination, regardless from where or where is it going we can solve it. Our priority is to offer a comprehensive cargo service and being able to warrantee the safety of your cargo as well.

We offer a timely and synchronized service for your importation and exportation processes thanks to our personalized care with representatives committed to your needs and to propose profitable alternatives for your operation.

Air Freight

Silca offers you a swift and excellent air freight service with our air freight net; we cover your business and markets until door to door delivery to final clients.

Maritime Freight

We are able of offering a fast, cost-efficient and reliable maritime freight through our alliances. We are in charge of all cargo transportation and offer quality services for Full Container Load (FCL) and Less Container Load (LCL).

Land Transportation.

We count with a fleet of transportation satellite traceable units, which allows us to monitor them until final destination.

Railway Service.

We give a safe, efficient and reliable railway service, which connects with Mexican ports and the most outstanding Mexican, American and Canadian markets.

Maneuvers coordination, storage and federal warehouse.

Project Cargo.

We are specialists in project cargo; we provide full services for the challenges in the logistic chain of oversized cargo, special shipments and production lines. From origin to destination, we assess the inherent requirements for every kind of cargo to transport it and achieve the objectives of the project.

Technological Resources

Thanks to our ample experience and innovative resources it is possible to reduce contingencies to a minimum, anticipate mishaps, strengthen safety and prepare your cargo for extreme conditions; however we know there are not risk free operations. Being aware of this, we recommend you insuring your cargo door to door.

Containers, cargo and transportation insurance

Protecting your cargo is an investment not a cost. For a fraction of the value of your cargo, we insure it so you can feel at ease.

"When it comes about cargo air or maritime freight SILCA Logistica has a suitable solution for you."

CONSULTANCY

International trade consultancy.

Globalization represents an outstanding challenge for our country and makes the state to look for more assertive means to protect the industry and national economy. This generates the creation of regulations and rules which turn out to be more complex and demand a better preparation and specialization from the people behind this service chain. At SILCA we count with specialists who will make much easier the experience in the process of international trade.

Tariff Classification and the creation of the tariff fraction catalog.

In which ways tariff classification may represent an advantage for your business? When classifying your merchandise –since the purchasing plans– we offer you a certainty as to the taxes to be paid and the regulations and non-tariff restrictions before its arrival to the country. As a result: zero interruptions during custom clearance flow.

Preventive Audit in International Trade Affairs.

A team of specialists assess the correct integration of the custom file, verifying it possesses evidentiary documentation of the fiscal and legal obligations of your international trade operations.

Legal Advice.

As a strategic part of our services, we have an expert group of lawyers trained in international trade affairs who can advise you on any situation generated from verification activities performed by the authorities.

"As a strategic part of our services, we have an expert group of lawyers trained in international trade affairs "

EXPERIENCE

"Fifteen years' experience strengthens our talent based on active learning, a value preserved as a formation initiative and constant development building labor approaches based on ACTT philosophy which can be defined as Act and Attitude: Analyze, Understand, Work and Transfer the knowledge."
